R'LIFT

ONLINE TRAINING

SAFETY AND REGULATION, WHAT YOU NEED TO KNOW.

The use of a Manual Elevating Platform (MEP), such as the R'LIFT range, is subject to regulations.

The compulsory operating licence: issued by the employer, it certifies that the operator is competent to use the equipment safety.

The employer's responsibility: It is his responsibility to assess the teams' competence, ensure their skills are developed and check that instructions are being followed.
The measures put in place to meet these requirements are determined by the employer.

The CACES® not suitable:
As the INRS and CARSAT* point out, the standard CACES® recommendations (MEP category) apply to motorised machinery and do not cover the specific characteristics of manual elevating platforms with a working platform height of less than 5 metres.
It is recommended that this be supplemented by familiarisation with the specific features of the machinery.

* OPPBTP Q&A article dated 10 October 2024: 'Is safety training or a driving licence required to operate a manually operated aerial work platform?

THEREFORE, TO SUPPORT OUR CLIENTS THROUGH THIS REGULATORY PROCESS, WE OFFER A TAILOR-MADE E-LEARNING MODULE. It helps to raise awareness amongst users and train them in the basic safety rules and the correct use of our R'LIFT range.

HOW DOES IT WORK?

Each user is granted their own individual access once the required licences have been purchased.
Once access has been granted, simply log in to your account to start the training.

A NUMBER OF MODULS AND QUIZZES

A number of topics are covered:

- Pre-use inspection ✓
- Checks ✓
- Machine operation ✓
- Emergency procedure ✓
- Storage the machine ✓

Each topic is followed by a quiz to to validate learning.

A certificate of achievement is awarded at the end of the training.

2 SPECIFIC TRAINING

TRAINING N°05026901
R'LIFT 350 / 420 / 420X
2026 RATE: €50 (EXCL. VAT)

TRAINING N°05026902
R'LIFT SMART 320 / 350
2026 RATE: €50 (EXCL. VAT)

REMINDER: REGULATORY INSPECTIONS OF R'LIFT

MACHINES OPERATED MANUALLY WITH THE AID OF A GAS STRUT

Initial commissioning: mandatory before using the machine for the first time.
Half-yearly general inspections: a general inspection must be carried out every six months.
Implementation: these checks must be carried out by the relevant inspection bodies, such as APAVE, Bureau Veritas, Dekra, etc.
