

HARNESS EXPERT

The EXPERT fall prevention harness is part of the personal protective equipment intended for work at height. Designed for intensive use. It comprises two anchor points (sternal and dorsal) and five adjustment buckles including four automatic ones: at thigh and shoulder height. It ensures safe working and grips the body perfectly. Comfortable thanks to its padded backrest, reinforced sit harness and sub-pelvic strap. This harness is further designed to avoid creating static electricity and it is ATEX certified. Part of the fall prevention system components. This harness is EN 361 and EN 365 compliant, CE certified and available in two sizes.

- ▶ A harness that allows working in complete safety (ensuring worksite safety and fall prevention).
- ▶ Two anchor points: dorsal (with an 8.00 mm metal ring) and sternal (with two metal 8.00 mm diameter rings that must be linked by a carabiner serving as the anchor point).
- ▶ The sternal anchor allows working under tension in a harness to concentrate entirely on the task at hand.
- ▶ High degree of adjustment freedom thanks to its four automatic adjustment buckles (only one adjustment is required, adjustment is no longer lost when putting the harness on or taking it off) at the thigh and shoulder level and thanks to its male-female metal adjustment buckle at the chest strap level.
- ▶ Polyester straps, 45 mm wide
- ▶ Ultra comfortable thanks to its backrest and sit harness padded with breathable foam.
- ▶ Two side attachment points are provided for tools
- ▶ Sub-pelvic and sternal straps to better hold the harness
- ▶ PVC clip to hold the surplus strap
- ▶ Designed for working in explosive atmospheres (ATEX certified) and to avoid creating static electricity. ATEX: this harness can be used in areas classified in zones 1 or 21 due to the presence of inflammable gases or vapours classified IIA or IIB or combustible dust and therefore also in areas classified in zones 2 or 22.

Sternal anchor with two metal buckles

Adjustable back strap

2 tool-holder rings
