

HARNESS MASTER

The MASTER fall prevention, work positioning and hanging harness is part of the personal protective equipment intended for work at height. Designed for ultra intensive use. It comprises two anchor points (sternal and dorsal), an abdominal D-ring, two positioning loops and five automatic adjustment buckles. Thanks to its retaining belt, the user can keep pressure on their feet while keeping their hands free to work. With its hanging function, the user can work while hanging thanks to the abdominal attachment point on the harness. Once the user is no longer on their feet, the load is spread across the belt and the harness thigh supports. It is part of the fall prevention system components. This harness is EN 361, EN 358 and EN 365 compliant, CE certified and available in two sizes.

- ▶ Harness for safe working (worksites safety, fall prevention, work positioning and hanging) with 47 mm wide polyester straps
- ▶ Two sternal and dorsal anchor points formed by a metal D-ring, an abdominal ring for looping onto a rope and two metal folding side retention buckles for work situations where positioning is required.
- ▶ High degree of adjustment freedom thanks to its five automatic adjustment buckles [only one adjustment is required, adjustment is no longer lost when putting the harness on or taking it off].
- ▶ Extremely comfortable with its padded belt, its reinforcing and its elastic thigh straps as well as its back comfort
- ▶ Abdominal ring at waist level to pass the rope line
- ▶ An extremely resistant lumbar retention belt with foam cushioning ensuring the user's work positioning
- ▶ Three attachment points are provided for tools
- ▶ Backrest designed for holding the user's back and improving their comfort
- ▶ PVC clip to hold the surplus strap
- ▶ Ideal for working while inclined
- ▶ It ensures safe working and grips the body perfectly

Abdominal ring

Metal sternal anchor

Padded thigh straps

Elastic thigh straps

Padded support belt with three tool-holder rings

Back comfort support
