

STEEL ANCHOR

A wall anchor point is a simple and always accessible mechanism for securing an operator performing one-off work. It can be installed on concrete, wood and metal structures. The hole for mounting the anchor has a 12.00 mm diameter. It is part of the fall prevention system components.

- ▶ Stainless steel wall-fitted metal anchor for all areas (concrete, wood and metal structures)
- ▶ For a single 12 mm diameter attachment for one operator
- ▶ Load: 12 kN
- ▶ Shape allowing proper connector positioning
- ▶ Easy to fit
- ▶ Compliant with standard EN 795 class A

Product characteristics	
Material	Stainless steel
Warranty (years)	10

To comply with the law and be sure to use equipment in perfect condition, all fall prevention PPE must be inspected every year and before use, always carry out a visual check. UNYC® personal protective equipment come with a 10-year guarantee from the date of manufacture and a 5-year guarantee from the date of initial use.
